PRODUCT PROFILE

- a) Purity: this product was isolated from antisera by immunoaffinity chromatography using antigens coupled to agarose beads.
- b) Antibody specificity: the antibody used for biotinylation reacts with the heavy chains on mouse IgG and with light chains common to most mouse immunoglobulins. No antibody was detected against non-immunoglobulin serum proteins. This antibody has been tested to ensure minimal cross-reaction with human, bovine and horse serum proteins, but the antibody may cross-react with immunoglobulins from other species.
- c) Antibody concentration: 0.5 mg/ml solution.
