

Product: **BIOTINYLATED AFFINITY-PURIFIED GOAT ANTI-MOUSE IgG (H + L)**

Code: **M003-6**

Lot:

Presentation: Stabilized buffered stock solution.

Production date:

Packaging: On request

PRODUCT PROFILE

- a) Purity: this product was isolated from antisera by immunoaffinity chromatography using antigens coupled to agarose beads.
- b) Antibody specificity: the antibody used for biotinylation reacts with the heavy chains on mouse IgG and with light chains common to most mouse immunoglobulins. No antibody was detected against non-immunoglobulin serum proteins. This antibody has been tested to ensure minimal cross-reaction with human, bovine and horse serum proteins, but the antibody may cross-react with immunoglobulins from other species.
- c) Antibody concentration: 3 mg/ml solution.

Recommended storage conditions: 2-8 °C

Stability: 12 months
